BUSINESS CONTINUITY PLAN REQUIREMENTS
Benefits of a BCP

1. Enhances the university’s ability to recover and resume academic and business operations.

2. Provides a comprehensive view of risks and impacts thus helping to prioritize activities and optimize resource allocation.

3. Reassures university stakeholders that critical processes will be supported in adverse conditions.

4. Improves the university’s chances of survival in the event of a catastrophe.

5. Protects the university’s resources and image.
BCP Requirements – 3 Major Development Phases

**Phase I**
(Initial)
Plan development to support operations at *the onset*.

**Phase II**
(Resumption)
Plan development to continue operations during a disruption.

**Phase III**
(Restoration)
Plan development to return operations back to normal.
**BCP Requirements – Phase I Details**

**Phase I**
(Initial Response)

Plan development to support operations at the onset.

- **Plan Roles**
  - Unit/department objectives & responsibilities
  - Plan Owner (Unit Leader), Manager, Alternate Manager
  - High-level description of unit/department

- **Identify Teams, Team Roles & Procedures**
  - Program objectives and responsibilities
  - Plan Owner (Unit Leader), Manager, Alternate Manager

- **Identify Alternate Location(s)**
  - Emergency Operations Center
  - Alternate work locations

- **Plan Communications**
  - Call tree
  - Internal key contacts
  - Vendors
  - Agency/departments
  - Plan attachments
Phase II (Resumption)

Plan development to manage operations during a disruption. (Contingency)

- Identify critical functions/processes, score to determine criticality, and prioritize business processes
- Identify process dependencies
- Specify peak times

Business Impact Analysis (BIA)

Risk Assessment

Contingency Strategies

- Identify and document process risk
- Determine mitigation strategies

- Identify contingency strategies for:
  1. Loss of people
  2. Loss of applications
  3. Loss of building
  4. Loss of suppliers (supply chain)
Phase III (Restoration)

Plan development to identify requirements & restore operations back to the ("new") normal.

- Asset Identification and Dependency Mapping
  - Assets needed to resume each process to acceptable level of service
    - Workstations
    - Telecom
    - Hardware & software equipment
    - Vital records
  - Dependent IT applications/services
    - Identify the amount of time within which information must be restored before an adverse effect
- Recovery
- Maintenance & Exercise BCP Requirements
  - Document process for returning to "new normal"
  - Plan maturity model and objectives
  - Maintenance cycle requirement
  - Exercise cycle, options, and objectives
  - Metrics
BCP Requirements - Plan Components

1. Executive Summary
2. Business Impact Analysis (BIA)
   a. General Information
   b. Plan Owner
   c. Responsibility description for which the plan covers
   d. Name of critical activity / function
   e. Recovery Time Objectives (RTOs)
   f. Recovery Point Objectives (RPOs)
   g. Service Level Agreements (SLAs)
   h. Peak period
   i. Headcount (BAU vs Critical Need)
3. Risk and Impact Assessments
   a. Financial
   b. Service
   c. Reputational
   d. Regulatory
   e. Legal
4. Dependencies
   a. Application/systems
   b. Facility
   c. People
   d. Supplier
5. Recovery Requirements
6. Risks
7. Continuity Strategies
   a. Loss of building
   b. Loss of people
   c. Loss of IT
   d. Loss of supplier
8. Supporting Documentation
9. Contact List
